Profile

Software engineering student with experience developing enterprise, AI-assisted, and web-based applications. Strong foundation in software design, OOP, databases, testing, and system architecture. Built scalable solutions using Java, JavaScript, React, Node.js, SQL, and cloud services, with projects involving authentication, AI integrations, geospatial processing, and workflow automation. Interested in backend engineering, full-stack development, and large-scale software systems.

Education

B.Tech (CSE), MIT, Chh. Sambhajinagar - CGPA: 8.49	2026
12th, Z.P Secondary and High. Secondary School, Washim - 77.83%	2022
10th, S.M.C English School, Washim - 94%	2020

Experience

Full Stack Developer Intern, Paarsh Infotech Pvt. Ltd.	01/2026 – 05/2026 Nashik
- Developed software modules supporting customer and order management workflows. - Implemented validation and business rules improving system reliability. - Participated in development, testing, debugging, and maintenance activities. - Collaborated on architecture and feature planning discussions.	

Projects

CityPulse — Smart Traffic Navigation System (In Progress)	
<i>YOLOv8, OpenCV, Node.js/Express, PostgreSQL/PostGIS, Google Maps API</i>	
- Built YOLOv8 nano vision pipeline with ROI-based queue estimation and multi-frame median sampling, deployed on a Linux environment with Python/OpenCV for real-time intersection monitoring - Designed adaptive signal scheduler computing green/yellow/red phases dynamically from live queue data, preventing collision states across concurrent intersections - Mapped live signal states to user routes via Google Directions API + PostGIS ST_DWithin (50m radius), querying decoded polylines for sub-100ms spatial lookups - Stored and managed distributed intersection state (signal, timer, queue) in Supabase PostGIS using GIST-indexed GEOGRAPHY columns, enabling fast concurrent spatial upserts across geographically dispersed nodes	
IDEAL - AI-Assisted Web IDE	
<i>Next.js, React, TypeScript, Tailwind, ShadCN, Monaco Editor, Xterm.js, Piston API</i>	
- Designed and developed a browser-based IDE enabling code execution on low-spec systems by offloading compilation and runtime to remote services. Integrated Monaco Editor and terminal interfaces to support real-time code execution and feedback. - Implemented client-side file system handling and controlled editing restrictions to support testing and learning environments. - Collaborated in a team of three and owned end-to-end frontend and backend integration workflows.	
AttendIQ - AI-Powered Attendance Management System 	
<i>React, Vite, Node.js, Express.js, MongoDB Atlas, Groq API, Passport.js, Google OAuth 2.0</i>	
- Built full-stack attendance system with RESTful Node.js/Express APIs for subject-wise and date-wise tracking, with real-time MongoDB Atlas sync and AI-driven at-risk student insights via Groq API (LLaMA 3.1-8b-instant) - Integrated Google OAuth 2.0 via Passport.js for secure passwordless authentication with production-hardened cross-domain session handling across Vercel (frontend) and Render (Linux containerized backend) - Developed responsive React + Vite dashboard with live stats, weekly trends, and AI-generated intervention reports surfaced from attendance pattern analysis - Managed deployment reliability across cloud boundaries — configured CORS policies, secured API routes, and validated end-to-end data flows to ensure consistent service availability in production.	

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL Frameworks: React.js, Next.js, Node.js, Express.js, Spring Boot, Hibernate Databases: MySQL, PostgreSQL, MongoDB	Engineering Concepts: OOP, Data Structures, Algorithms, System Design, SDLC, REST APIs Developer Tools: Git, GitHub, VS Code, Postman, Vercel, Render
--	---

Certificates

- **Citi ICG Technology – Software Development Job Simulation (Forage)** [link](#) 
 - **Business Intelligence with Power BI and Excel - CloudThat**
- **Agentic AI - IBM Skillsbuild Summer Certification program** [link](#) 
 - **System Thinking - MIT**

Leadership & Activities

- Event Management Lead, College Student Council — planned and executed technical and cultural events.
- Co-Creative Head, Department E-Magazine Committee — managed content coordination and visual structure.
- Volunteered across multiple academic and departmental initiatives supporting teamwork and coordination.
